

**Declaration of Conformity – REACH Nr. 1907/2006  
Obligation Arising Out Of Article 33**

Date: 2023/07/18

---

**Emil A. Peters GmbH & Co. KG**

We declare conformity to Directive 2011/65 / EU of the European Union and of the Council of June 8, 2011 - RoHS and the associated directives and regulations (EU Directive 2015/863 of March 31, 2015).

Our chemical suppliers are based in the EU or Germany and are subject to the laws and regulations of the EU and the respective national laws.

Our products do not contain any of the listed prohibited substances or regulated substances in a higher concentration than specified in the chemical lists.

## Per- and Polyfluoroalkyl Substances PFAS

Date: 2023/07/18

All participants in a supply chain are legally obliged to determine and publish information about PFAS in the products.

PFAS means “Per- and Polyfluoroalkyl Substances”.

PFAS – verification applies to all fluorine-containing materials used in the finished product, as well as in the production of components in general, such as fluoroplastic seals.

O-rings made of the material FKM/Viton could be in our products and be affected by the regulation. Since we take the upcoming directive and the market survey for the upcoming new directive or DECHA prohibited list very seriously, we are in contact with our various O-ring manufacturers about PFAS. Our suppliers have already banned excipients from PFAS compounds in process. They produce fully reacted materials made of FKM/Viton.

These FKM materials are not bio-accumulative and by not using PFAS additives (due to process changes) the O-rings do not contain any PFAS residues!

Timetable (Origin: Statement of PFAS of Frank GmbH) for new list/directive (PFAS)

The EU Parliament decision is made after the committees have given their opinion. It is expected that PFAS will be banned. Whether fluorinated carbons will be banned in general is still an open question.

We confirm that our products do not contain PFAS.
